 - 6.2 Revision history
 - 6.3 Cross-references

Document 36 — Sample Report Appendix

A worked example of a VentureMiner AI full report. Synthetic data; illustrative; the reference for the report generation engine.

Table of Contents

1. Purpose & Scope
2. The brief
3. The full report
4. Annotated notes (per section)
5. Engineering reference
6. Appendix

1. Purpose & Scope

This document is a worked example of a VentureMiner AI full validation report. It exists for three reasons:

1. For product and sales: to show what a customer actually receives.
2. For design and engineering: to anchor the report rendering pipeline.
3. For QA and testing: as a reference fixture for the report grader.

The data in this report is synthetic. The opportunity — "AI-powered compliance co-pilot for solo accountants" — is a plausible but invented example.

2. The brief

User: Maya, indie founder.

Seed: "AI tools for solo accountants."

Depth: Standard.

Rubric: Default v1.0.

3. The full report

(The following is the report as it would be rendered to the user.)

VentureMiner AI — Validation Report

Opportunity: AI-powered compliance co-pilot for solo accountants Date: 2026-07-20 Depth: Standard
Rubric: Default v1.0 Generated by: AGT-ORCH + AGT-RPT-WRITER Verifier status: ■ Passed
(AGT-VERIFY)

2-person firms), growing at 6.2% CAGR. Demand signals are strong (rising search volume, recurring forum complaints) and competitor offerings are fragmented, with no dominant AI-native product. The opportunity scores 7.6 / 10 on the default rubric, with high confidence.

Recommendation: Pursue as a v1.0 SaaS product. Target solo accountants and 2-person firms in the US; expand to UK / CA / AU in v2.

Top 3 risks:

- 1. Regulatory regime changes can invalidate the core value prop overnight.
- 2. Established tax software (Intuit, Wolters Kluwer) can ship a similar AI co-pilot in 12–18 months.
- 3. The 1099 vs. W-2 distinction creates a sub-segmentation that doubles the surface area.

Top 3 opportunities:

- 1. Strong pull from public forums (Reddit r/Accounting, TaxProTalk) for AI help.
- 2. Existing tools are workflow-oriented, not AI-native; a 10x UX is feasible.
- 3. White-label and accounting-firm partnership channels are underused.

1. Market

TAM: \$9.4B (US solo + 2-person accounting firms' annual software spend). SAM: \$2.1B (US solo + 2-person firms using cloud tools). SOM: \$84M (1% SAM capture over 5 years).

Solo accountants (US)	290,000	IRS 2024 active PTIN holders
2-person firms (US)	78,000	IRS 2024 firm count
Estimated spend / firm / yr	\$32,400	Industry average for cloud tax + workflow

Growth: 6.2% CAGR (US solo accounting market, 2019–2024 actuals from IBISWorld; forecast 2024–2029).

Confidence: Medium (triangulated from 3 sources; some analyst disagreement on solo-specific growth).

Sources:

- IBISWorld — US Accounting Services Industry Report, 2024.
- Intuit QuickBooks SMB Trends Report, 2025.
- IRS Statistics of Income, 2023 (active PTIN holders).

2. Demand

Search volume (Google Trends, US, last 24 months, indexed):

"ai for accountants"	100 (peak)	+180%
"ai tax software"	72	+95%
"compliance automation accountant"	38	+62%

- Reddit r/Accounting: 412 posts in the last 90 days mentioning "AI" or "automation" with compliance context.
- Twitter/X: 1,250+ posts with #aiaccountant in last 90 days.
- Hacker News: 6 Ask HN threads about AI for tax/compliance in last 6 months.

Intent signals:

- 8,400 monthly searches for "best ai tax software".
- 3,200 monthly searches for "automate quarterly taxes".

Confidence: High.

Sources:

- Google Trends export, captured 2026-07-19.
- Reddit API export, 2026-07-19.
- X API v2 export, 2026-07-19.

3. Competitive landscape

Intuit ProConnect	Tax workflow, established	\$1,200/yr (firm)	Limited (CoCounsel)	Public
Wolters Kluwer CCH	Compliance + research	\$3,000+/yr	Limited	Public
Keeper	AI-native bookkeeping	\$400/mo	Strong	Series A
TaxDome	Workflow + CRM	\$300/mo	None	Series A
Botkeeper	Bookkeeping automation	\$800/mo	Strong	Series C
Gap:	AI-native compliance co-pilot	\$200–400/mo	(target)	—

Gaps identified:

1. No product is AI-native for compliance specifically (Keeper / Botkeeper are bookkeeping-first).
2. No product offers plain-language compliance Q&A; (most are form-filling).
3. Multi-state compliance orchestration is poorly covered.

Confidence: High.

Sources:

- G2 reviews for each product, 2026-07.
- Pricing pages, captured 2026-07-19.

4. Pricing benchmarks

Entry	\$99–199/mo	Form fill + storage	TaxDome, Keeper
Mid	\$300–500/mo	+ AI Q&A; + multi-state	(gap)
Pro	\$800–1,200/mo	+ white-label + API	Intuit ProConnect

Recommended pricing for the new product:

- Solo: \$199/mo.
- Pro: \$399/mo.
- Firm (white-label): \$799/mo + per-seat.

5. Buyer personas

Persona 1 — Solo CPA "Maya" (the buyer)

- Demographics: 35–55, US, IRS PTIN holder, 1–2 person firm.
- Pains: Quarterly tax crunch, multi-state filings, regulatory change anxiety.
- Jobs: File accurately, on time, with less manual work.
- Information sources: IRS.gov, TaxProTalk, Reddit r/Accounting, peers.
- Quote: "If I could ask a question and get a confident answer with a citation to the actual regulation, I'd pay \$200/mo for that."

Persona 2 — Small firm partner "Daniel" (the influencer)

- Demographics: 40–60, multi-employee firm, growth-oriented.
- Pains: Junior staff ramp, consistency across the team.
- Jobs: Scale without proportionally scaling headcount.
- Quote: "If my junior staff could ask the AI before interrupting me, I'd save 5 hours a week."

Confidence: High.

6. Willingness to pay (WTP)

Range: \$150–400/mo (Solo plan).

Van Westendorp (qualitative)	\$150–400
Competitive benchmark	\$200–500 (mid-tier)
Forum sentiment	\$150–300 (price-sensitive)

Recommended Solo price: \$199/mo. Pro price: \$399/mo.

Confidence: Medium-High.

7. GTM channels

SEO ("ai for accountants")	High intent; growing 180%	\$200–500
TaxProTalk / Reddit	Niche; trusted	\$100–300

SEO ("ai for accountants")	High intent; growing 180%	\$200–500
Accounting firm partnerships	White-label for 5–10 firms	\$500–1,500
Industry conferences (AICPA, Scaling New Heights)	High-trust; expensive	\$2,000–5,000

Recommended primary channel: SEO + Reddit. Secondary: partnerships.

8. Risk register

1	Regulatory regime change (e.g. new IRS rule)	Medium	High	Continuous RAG reindex; human-in-loop verifier
2	Established competitor ships similar	High	High	Speed to market; 12-month product moat; community
3	AI hallucination on specific regulation	Medium	High	Citation per claim; verifier; conservative output style
4	Sub-segmentation (1099 vs. W-2)	Medium	Medium	Single primary persona first; expand in v2
5	Sales cycle > 6 months (firm tier)	Medium	Medium	Solo-first wedge; land-and-expand
6	Pricing resistance	Low	Medium	Free trial; first-month discount; lower-tier SKU

9. Score breakdown

Market size	20%	7.0	1.40	High	\$9.4B TAM, growing 6.2%
Growth	15%	6.5	0.98	Medium	Steady, not explosive
Demand	20%	8.5	1.70	High	+180% search; strong social
Buildability	15%	7.0	1.05	High	9-month MVP feasible
Defensibility	15%	6.0	0.90	Medium	Brand moat possible; tech moat weak

Market size	20%	7.0	1.40	High	\$9.4B TAM, growing 6.2%
AI-fit	15%	9.0	1.35	High	Native AI advantage
Total	100%		7.38 → 7.4	High	

10. Citations & sources

Every claim in this report is bound to a chunk in the RAG corpus. Below is a representative subset; the full provenance panel in the app shows every source with freshness.

Market	"\$9.4B TAM"	IBISWorld US Accounting Services 2024	2026-07-19	Recent
Demand	" +180% search"	Google Trends export	2026-07-19	Live
Competitive	"Keeper pricing \$400/mo"	keeperapp.com/pricing	2026-07-19	Live
Persona	"5 hours saved per week"	TaxProTalk thread, 2026-05	2026-07-19	Recent

11. Next steps

- 1. Validate pricing with 5 design partners (1-week trial, \$99/mo).
- 2. Build MVP in 9 months: AI Q&A; + multi-state compliance + Slack/email delivery.
- 3. Acquire first 100 customers via SEO + Reddit (CAC < \$300).
- 4. Expand to UK + CA + AU in v2.

4. Annotated notes (per section)

These notes are for the engineering team building the report renderer, not for the user.

4.1 Cover

- Renders from report.cover template.
- Fields: title, opportunity, date, depth, rubric, generated_by, verifier_status.
- Verifier status shown as a colored badge (Document 04 §13.2).

4.2 Executive Summary

- First 4–6 sentences auto-generated by AGT-RPT-WRITER with a "highlights" prompt.
- Recommendation, top 3 risks, top 3 opportunities rendered as cards.

4.3 Market

- Confidence badge on the section header.

4.4 Demand

- Chart: trend over time (24 months).
- Social signals as sparklines.
- Source list.

4.5 Competitive

- Table with sortable columns.
- "Gap" row highlighted.
- Gaps list rendered as a callout.

4.6 Pricing

- Table of competitor tiers.
- Recommended pricing in a highlighted box.
- Rationale paragraph.

4.7 Personas

- Each persona as a card.
- Quote rendered with an em-dash and a citation link.

4.8 WTP

- Method + estimate table.
- Range shown as a horizontal bar.
- Recommended price highlighted.

4.9 GTM

- Table of channels with evidence + CAC.
- Recommended primary/secondary.

4.10 Risk register

- Table with sortable columns.
- Likelihood and impact as colored badges.

4.11 Score breakdown

- Table of dimensions.
- Total rendered as a large stat.

4.12 Citations

- Truncated table; full table in the in-app provenance panel.
- Each row links to the chunk in the corpus.

4.13 Next steps

- Numbered list; each step is a CTA in the app ("Add to roadmap", "Create report for this").

5. Engineering reference

This report was generated by:

- Orchestrator: AGT-ORCH
- Specialists (in order): AGT-RSRCH-MARKET, AGT-RSRCH-DEMAND, AGT-RSRCH-COMP, AGT-RSRCH-PRICING, AGT-RSRCH-PERSONA, AGT-RSRCH-WTP, AGT-RSRCH-GTM, AGT-RSRCH-RISK
- Scoring: AGT-SCORE (default rubric v1.0)
- Report writer: AGT-RPT-WRITER
- Verifier: AGT-VERIFY (passed)

Token budget consumed: ~340k (within Standard depth budget of 400k). Wall-clock: ~6 min 40s.
Verifier pass rate: 100% on first pass.

The report.json payload (used by the renderer) is in the test fixture at agent-runtime/fixtures/reports/standard-accountant.json.

6. Appendix

6.1 Glossary

TAM	Total addressable market
SAM	Serviceable addressable market
SOM	Serviceable obtainable market
PTIN	Preparer Tax Identification Number (IRS)
RAG	Retrieval-Augmented Generation
WTP	Willingness to pay
GTM	Go-to-market
CAC	Customer acquisition cost

6.2 Revision history

v0.5	2026-07-20	Doc Team	Sample report drafted
v1.0	2026-07-20	Doc Team	First approved version

6.3 Cross-references

- PRD: Document 01.
